TERBITAN IAEA YANG TERKINI (DIS 2019)

The IAEA is pleased to announce the publication of:

Design of the Reactor Containment and Associated Systems for Nuclear Power Plants

IAEA Safety Standards Series No. SSG-53

This Safety Guide provides recommendations on meeting the requirements of IAEA Safety Standards Series No. SSR-2/1 (Rev. 1) relevant to reactor containment and associated systems. The publication addresses the containment structure and the systems with the functions of isolation, control and management of mass and energy releases, control and limitation of radioactive releases, and control and management of combustible gases. The Safety Guide is intended for use primarily for land based, stationary nuclear power plants with water cooled reactors designed for electricity generation or for other heat generating applications, such as for district heating or desalination.

STI/PUB/1856, 89 pp., 2 figs; 2019; ISBN: 978-92-0-102819-8, English, 41.00 Euro

Developing Cost Estimates for Environmental Remediation Projects

IAEA Nuclear Energy Series No. NW-T-3.8

This publication addresses costs arising during individual phases of an environmental remediation project, how they can be calculated, and how they can be structured and documented. It provides the methodology of cost estimation and includes examples of cost estimate models, development plans, cost elements and work breakdown structures. The guide also contains an overview of potentially suitable remediation technologies, which may help the reader to structure the options study.

STI/PUB/1857, 85 pp., 10 figs; 2019; ISBN: 978-92-0-103219-5, English, 41.00 Euro
